

A dense crowd of people is shown from a low angle, filling the frame. Many individuals are holding open umbrellas, creating a pattern of dark shapes against a lighter background. The crowd is diverse in age and attire, with some people wearing hats and sunglasses. The overall atmosphere is one of a large gathering or event.

A close-up photograph of a young child's face and upper body. The child has dark skin and is wearing a white tank top with thin black horizontal stripes. They are looking down intently at a piece of paper or a book they are holding in their hands. The lighting is very dim, casting deep shadows and giving the scene a somber, dramatic feel.

A screenshot of a crowdfunding platform interface. It shows a grid of project cards with small thumbnail images and project names. Projects include "Congo" (with a person working on a computer), "India" (with people in a classroom), "Subsaharan Africa" (with a person working outdoors), "Colombia" (with a bridge over water), and "Puerto Rico Desastre" (with a group of people).

A screenshot of a DApp interface. On the left, there's a sidebar with "Connects" and "Contracts" sections. The main area has a "DEX" section with a search bar and a table of trading pairs. To the right, there's a "INDEX BLOCK" section with a chart and a "TOKENES" section with a table of tokens.

A screenshot of a DEX interface. It features a "DEX" section with a chart showing price movements, a "DEX INDEX" section with a table of indices, and a "DEX TRADES" section with a table of trade details.

A screenshot of a marketplace interface. It shows a "Solar PV Inverters" section with a grid of products and a "Compare Products" section where users can select and compare different inverters.

BUSINESS MODEL FEATURES

-  Acceptance of the main cryptocurrencies
-  Crowdfunding Commissions
-  Commissions of the marketplace
-  Commissions of the generated tokens
-  Commissions of exchange trades

GOAL: Get USD \$ 1.- for each person who joins the grid.

CO₂IN: A system of positive incentives to achieve the immediate implementation of the Paris Agreement.

Abstract. A system of positive economic incentives purely based on cryptocurrencies will allow the international community to raise the financial flows agreed in the Paris Agreement. These flows will serve to stimulate green initiatives around the world for compliance and immediate implementation of the agreement, and thus avoid trying to achieve it by other means having to take measures harmful to the economies of the signatory countries such as new taxes, regulations,

A large herd of deer is grazing in a field of tall, green grass. The deer are of various ages and are scattered across the frame, some facing the camera and others looking away. The background is slightly blurred, creating a sense of depth.
